

eGecko 2

Barcode Label Application System

- Efficiently and accurately applies labels to a wide range of microplates and petri dishes
- Controlled via keyboard and mouse linked to an Integrated PC and display
- Barcode reader available to verify barcodes once applied

The eGecko labelling system is an automated device used to apply adhesive labels to microplates and petri dishes. It can be used to label individual plates and dishes, or it can be combined with an OEM plate handling system, such as the Scorpion handling system, to provide a fully automated labelling station.

Width	500mm
